Veteran Directed Care Office Hour
Session Four
October 13, 2021
Victoria Wright, Program Officer for Veteran Directed Care and Inclusive Transportation Programs
Agenda

- Welcome and Announcements from the Administration for Community Living (ACL)
- Recap of the VDC Office Hour Series
- VDC TA Community
- Fiscal Year (FY) 2022 Case Mix Rates
- Focused Topic Discussion: Global budgets and goods and services approval
- Open Question and Answer (Q&A)
- Closing
VDC Office Hour Series

• Since July 2021, ACL has offered three VDC office hour sessions focused on bringing together business acumen and person-centered strategies.

• Through the VDC office hour series, VDC providers have been able to hear from peers, learn about best practices, and ask questions on topics including managing invoices, developing person-centered Veteran spending plans, monitoring Veteran spending, and sharing monthly service reports.

• Resources from the VDC office hour series can be found on ACL’s No Wrong Door (NWD) website VDC page: https://nwd.acl.gov/vdc.html

My Organization is a VDC Provider

VDC providers are Aging and Disability Network Agencies (ADNAS) that have completed a VA VDC Readiness Review, have a fully executed provider agreement with the VA and are serving Veterans referred by their local VA Medical Center(s). The following resources are available to support program administration:

- **NEW** VDC Billing and Invoicing Guide
  This guide is a resource that outlines billing and invoicing procedures to assist with and ensure timely and accurate reimbursement for VDC invoices.

- **NEW** VDC Monthly Services Report
  VDC programs can use this Monthly Services Report template to track Veteran VDC spending by documenting actual spending.

- **NEW** VDC Spending Plan
  The VDC Spending Plan helps map how Veterans intend to use their VDC budget and estimate spending during their authorization period.

FAQ: Veteran Spending Plan - Determining a Veteran’s Available Budget

**Question:** What if the authorization period is different than the budget period? For example, referral on 07/01, authorization start date on 08/01, and budget approved 09/01. How do you calculate the 12-month total?

**Response:**

- The Veteran’s total spending should be based off the “average monthly budget.” For example:
  - A Veteran is referred to VDC for a 12-month period (7/1/2021 – 6/30/2022). Their “global budget” is $24,000 and their average monthly budget is $2,000.
  - It takes thirty days for the Veteran to develop a plan (to include identifying, hiring, and training their employees) and for the VAMC to approve the plan. The Veteran begins using their VDC budget on 8/1/2021.
  - The Veteran’s spending should still average out to $2,000 per month [or $22,000 total over the remaining eleven months] even though they are authorized for $24,000.
FAQ: VDC Claim Resubmission

**Question:** What happens if you submit a corrected claim that requires repayment to the VA?

**Response:**
- If the VDC provider needs to submit payment to the VAMC, the VAMC is going to need to issue a Bill of Collection (BOC).
- A BOC is issued by the VAMC and provides instructions for the VDC provider to submit payment to the VA.
- VAMCs have been provided with guidance on this process.
- VDC providers should communicate with their VAMC regarding local practices for issuing a BOC.
- VAMCs can contact the internal VA VDC mail group if there are any questions regarding this process.
Overview of the VDC TA Community
Overview of the VDC TA Community – Discussion Board

Engage with other VDC providers on the VDC Discussions board by responding to an existing post or starting your own new topic using the “Start a new topic” button.
Overview of the VDC TA Community – Peer-Created Resources

Upload your own VDC-related resources for other providers to reference in the Peer-Created Resources section using the “Add resource” button.
Overview of the VDC TA Community – Search Bar

• Use the search bar to look for resources by entering in topical keywords (e.g., case-mix)
• The search bar can also be used to look up contacts in a certain state (e.g., Texas) or organization (e.g., Veteran Service Organization) to directly message on the platform

FY2022 Case Mix Rate Calculator: Next Steps for VDC Providers

- Review FY2022 Case Mix Rate Calculator
- VAMCs will use the FY2022 Case Mix Rates for new and updated VDC authorizations beginning on October 1, 2022
- VDC providers should review new VDC authorizations to verify changes in case mix rates have been applied
- Submit updated Veteran spending plans to your partnering VAMC for approval
Global Budgets
Understanding Global Budgets

• A “Global Budget” is the total budget that the Veteran has available during the authorization period.
• “Global budget” guidance eliminates the need to account for “planned savings” that was previously used in VDC.
• Veteran spending in a month may exceed the average monthly case-mix rate.
  ► This is permissible if all spending is in the approved spending plan and does not exceed the Veteran’s total authorized budget (the Veteran’s global budget).
  ► Veteran spending over the course of the authorization, when the Veteran uses their budget, should be based on the average monthly case mix rate.
Understanding Global Budgets, cont.

- Veteran spending in a month that exceeds the average monthly case-mix rate can happen for several reasons to include routine care, planned purchases, and emergency back-up care. For example:

  - A Veteran receives care every Monday (as documented in the approved VDC spending plan).
    - Some months during the authorization period will have four Mondays while others will have five. In months where there are five Mondays, routine spending may exceed the average monthly case-mix rate.

  - A Veteran’s primary caregiver plans to take a two-week vacation.
    - As outlined in the VDC spending plan, the Veteran will need to temporarily use a care agency to help with their personal care needs, which is more expensive than the hourly wage of the caregiver going on vacation. Therefore, this increase in spending may exceed the average monthly case-mix rate during this month.

  - A Veteran includes a one-time purchase of $800 in their approved VDC spending plan for a modified lift bed.
    - In the month in which this purchase is made, spending will exceed the average monthly case-mix rate.
Understanding Global Budgets: VDC Spending Plan Template

ACL has made changes to the VDC Spending Plan Template to assist with developing VDC Spending Plans based on “global budgets.”

VDC provider will enter the total budget, the number of months the Veteran will use their VDC budget, and the VDC monthly case mix rate.

The VDC Spending Plan will calculate if the average spending is within the case mix rate and calculate the difference between the Veteran’s global budget and their total spending.
Special Cases: Veteran Example 1

- Veteran is referred to VDC and starts using their budget two months into their authorization period.
  - Veteran was referred to VDC on 10/1/2021, it took 30 days to complete the assessment and an additional 30 days to identify and hire employees.
  - Therefore, the Veteran will only end up using their budget for 10 months.

</tr>
<tr>
<td>Total Spending During Authorization (Estimate):</td>
</tr>
<tr>
<td>VDC Budget Remaining (Estimate):</td>
</tr>
</tbody>
</table>

Estimated monthly spending as well as one-time purchases and emergency back-up care.

Average spending is within the case mix rate and total spending is within the “global budget”
Special Cases: Veteran Example 2

• Veteran’s case-mix changes half-way through their authorization.
  ► If the VAMC issues a new authorization, the VDC provider can develop a new VDC Spending Plan based on the new authorization.
  ► If the VAMC updates the authorization, the VDC provider can create a new VDC Spending Plan following the guidance below.
    - The VDC provider and Veteran can preferably base their new VDC Spending Plan off the new case mix rate and remaining months in the authorization.
    - If the Veteran had any one-time purchases from the previous case mix and VDC spending plan which the Veteran still requires, the VDC Provider will need to:
      • Add this amount to cell ‘C19’ in the Veteran Spending Plan tab, and
      • Note if this additional spending will cause the average monthly spending to exceed the new case mix rate (cell ‘C23’).
Special Cases: Veteran Example 2, cont.

- If the Veteran did not have any one-time goods or emergency backup from the previous case mix…

<table>
<thead>
<tr>
<th>Estimated Totals for Authorization Period</th>

</tr>
<tr>
<td>Average Monthly Spending</td>
</tr>
<tr>
<td>Estimated Average Monthly Spending Within Case Mix Rate?</td>
</tr>
<tr>
<td>Total Spending During Authorization (Estimate):</td>
</tr>
<tr>
<td>VDC Budget Remaining (Estimate):</td>
</tr>
</tbody>
</table>
Special Cases: Veteran Example 2, cont., pt. 2

- In this example, the Veteran had previously planned for $400 in emergency back-up care due to a planned vacation for the primary caregiver.
- The Veteran still requires this back-up care in addition to $300 additional back-up care.

This “global budget” includes the case-mix rate for the total months ($3,035 * 5) plus the $400.

The previously planned for emergency back-up care causes the average monthly spending to exceed the case mix rate but is still within the “global budget.”
Goods and Services Approval
Goods and Services Criteria

• The purchase of goods and services must meet all the following criteria:

1. Meet the identified needs, goals and outcomes in the Veteran’s spending plan; AND
2. Improve the Veteran’s ability to remain safely in their home; AND
3. Address activities of daily living or instrumental activities of daily living needs of the Veteran; AND
4. Be the least costly alternative that reasonably meets the Veteran’s identified needs; AND
5. Not be provided or paid for by VA, Medicare, Medicaid, TRICARE, or other agency, organization, program, service, or insurance; AND
6. Not be the responsibility of the Veteran as a homeowner to maintain, repair, or replace; AND
7. Must meet one or more of the following goals:
   i. Enhance community inclusion and support the Veteran’s ability to remain in their home and access their community resources and network;
   ii. Increase the Veteran’s independence;
   iii. Develop, maintain, or improve personal, social, physical, and/or work-related skills;
   iv. Decrease dependency on formal support services (i.e., reduce the need for human assistance);
   v. Increase Veteran’s safety in their home and community; and/or
   vi. Enhance family involvement by increasing the ability of direct care workers and caregivers including family members and friends to receive education and skills training needed to provide support to the Veteran.

AND;
8. Be for the Veteran.
